Summary

Enthusiastic and motivated DevOps Engineer with strong hands-on experience in Linux, AWS, CI/CD pipelines, containerization, and Infrastructure as Code. Skilled in automating deployments using Jenkins and GitHub Actions, provisioning cloud infrastructure using Terraform, configuring servers with Ansible, and deploying containerized applications using Docker and Kubernetes. Strong understanding of DevOps principles, automation, monitoring, and scalable infrastructure design. Passionate about automation, system reliability, and scalable cloud infrastructure.

Technical Skills

- **Languages:** Python, HTML, CSS
- **Operating systems:** Linux (Rocky, Ubuntu, Debian), Windows
- **CI/CD:** Jenkins, GitLab, GitHub Actions
- **Containerization:** Docker, Kubernetes
- **Cloud Platform:** AWS (EC2, S3, IAM, VPC, EBS)
- **Monitoring:** Prometheus, Grafana, CloudWatch
- **Infrastructure as Code:** Terraform, Ansible
- **Tools:** VirtualBox, Gitbash, Winscp, MobaXterm

Projects

Production Linux Server Setup & Automation

- Provisioned and configured Ubuntu Linux server in a production-like environment.
- Implemented user and group management with role-based permissions.
- Deployed and configured Nginx web server for application hosting.
- Configured firewall rules using UFW to secure server access (SSH, HTTP/HTTPS).
- Automated daily backups using Bash scripting and cron jobs.
- Developed log monitoring scripts to track Nginx errors and system logs.
- Monitored CPU, memory, and disk usage for system performance optimization.

Monitoring Setup using Prometheus (Prometheus, Linux, Docker)

- Installed and configured Prometheus for system monitoring.
- Monitored CPU, memory, and application metrics.
- Configured node exporter for Linux servers.
- Set up alerts for system performance thresholds.

Education

- Malla Reddy University, Hyderabad (2021–2025) — B. Tech in Computer Science and Engineering | CGPA: 8.2/10
- Narayana Junior College, Hyderabad (2019–2021) — MPC | Marks: 964/1000
- Akshara High School, Kamareddy (2019) — SSC | CGPA: 9.5/10

Certifications

- Programming in Java – NPTEL (Apr 2023) | Gained hands-on experience in OOPs, multithreading, JDBC, and exception handling with practical coding assignments.
- Deep Learning – NPTEL (Jul 2024) | Studied CNNs, RNNs, LSTMs and implemented deep learning models using TensorFlow & PyTorch on real datasets.
- Cambridge B2 Level Certification – Cambridge English (Feb 2022) | Certified in advanced reading, writing, listening, and speaking, demonstrating strong professional communication skills.
